

AL/ML INTERNSHIP FINAL REPORT

1.Student Details:-

Name: SUBHAN TOLAT

Course: Diploma in Computer Science Engineering

Internship: Artificial Intelligence & Machine Learning

2.Objectives Completed:-

- Mathematical Foundation
- Supervised Learning
- Classification Models
- Clustering
- Neural Networks
- NLP Project
- Model Deployment using FastAPI
- End-to-End AI/ML Project

3.Tools Used:-

Google Colab

Python

Scikit-Learn

TensorFlow

FastAPI

Pandas

Numpy

4.Project:-

Project Title

Iris Flower Classification using Machine Learning

5.Dataset

Scikit-Learn

6.Algorithm:-

Random Forest Classifier

7.Deployment:-

FastAPI REST API created successfully.

API tested using Public URL.

8.Conclusion:-

During this internship I learned data preprocessing, supervised learning, neural networks, natural language processing, deployment and complete AI/ML lifecycle.

The internship improved my practical understanding of Artificial Intelligence and Machine Learning.
